LLM LATAS

IN LAW OF TECHNOLOGY AND AUTOMATED SYSTEMS

X EDITION **2026-2027**

Knowledge that matters.

WHY choose this LLM?

ORESTE POLLICINO PROGRAM DIRECTOR
FRANCESCO PAOLO PATTI DP BOCCONI-KING'S PROGRAM DIRECTOR
FEDERICA PAOLUCCI PROGRAM COORDINATOR
ELISA VALLETTA COORDINATOR

1 As technology continues to transform every aspect of society, young professionals are needed with the expertise to navigate the complex legal landscape of the digital world. This LLM provides just that, addressing critical issues related to privacy, AI, blockchain, cybersecurity, intellectual property, e-commerce, data protection and more. It aims to train **new professional figures** who are able to apply **existing legal tools to digital environments** and create **innovative legal solutions** adapted to the ever-changing digital economy.

2 Students learn from **leading experts** in the field who have practical experience in internet technology law. These professors bring real-world insights into the classroom and provide students with an **internationally acknowledged learning experience** and an **unprecedented competitive advantage** in the field.

3 A community of University and LLM Alumni is active all over the world. LLM holders have access to this **extensive network** for professional and employment opportunities.

4 Students can participate in an **interactive campus** life with many high-level conferences and events every year in a dynamic, physical and wired environment. In addition, Bocconi is located in downtown **Milan**, a **dynamic cultural and business hub** in the heart of Europe.

5 To further strengthen the LLM's international approach, an excellence program has been created **in partnership with King's College London**.
The **DUAL PROGRAM** offers an exclusive opportunity for a limited number of students to delve into the complex world of technology law in a unique international environment.

>

Learning Objectives

The LLM in Law of Technology and Automated Systems focuses on all key areas of interest for lawyers and legal practitioners dealing with the impact of digital transformation and the implementation of disruptive technologies such as Artificial Intelligence and Blockchains.

The program is unique in providing a comprehensive **overview of the legal issues emerging in the digital age**, including **copyright and intellectual property rights protection**, **data protection, and competition in the digital age**.

Recognizing that the field of internet technology law is inherently interdisciplinary, the program encourages collaboration with other disciplines such as computer science, business, and ethics to provide a holistic perspective on internet technology.

The final goal is to prepare tomorrow's professionals to find cutting-edge solutions to the legal questions emerging from digital transformation.

Candidate Profile

The LLM is targeted towards current and future legal practitioners who wish to access an **internationally acknowledged curriculum** and the skills to start or further develop a promising career in law and technology.

The program prepares participants for careers in legal professions dealing with the impact of digital transformation at:

– tech companies, media companies and companies relying on digital assets in general
– domestic and international law firms with specialized practices
– governments and public regulatory institutions
– universities and think tanks, as well as non-governmental organizations

< >

Program Structure and Study Plan

The LLM is **taught entirely in English**. The program lasts **12 months**, but a part-time version (which lasts 2 years) is also available. This professional program features prominently hands-on activities. Close relations with specialized law firms and digital, high-tech companies, as well as national or international regulatory institutions, is ensured – also in view of internships and clinical work.

For the full-time program, all courses take place **from September 2026 until April 2027** and all practical activities take place between May and July 2027.
The programs awards **62 ECTS** credits in total.
Each module and sub-module will be taught by top-tier experts and specialists of each subject.

6 COMPULSORY COURSES

– Economic and Management Principles of Digital Markets
– Intellectual Property and Competition Law in the Digital Age
– Data Law
– Fundamental Rights Protection in the Digital Age
– Legal English Drafting
– Legal Tech

4 ELECTIVE COURSES*

– Digital Markets and Services: Legal issues
– Data Protection Law and Cybersecurity
– Transactional Law in the Digital Context
– Digital and Social Sustainability: Legal issues
– Law of Blockchain and Cryptoassets
– Robotics and Artificial Intelligence: Legal issues

The Dual Program affords students access to specialized elective courses curated by King's College London. For additional information, please refer to the website.

PRACTICAL ACTIVITIES

The final activities may consist of an internship, a short thesis, a legal clinic in collaboration with Wikimedia, or a moot court competition within the Comparative Law in Action framework. The program may also be enriched with additional extracurricular clinical work to develop practical skills and an applied approach to legal problem-solving.

DUAL PROGRAM - KING'S COLLEGE

Participants can apply to attend the LLM in Law of Technology and Automated Systems in the Dual Program version organized with **King's College London**. It is a highly specialized and prestigious program tailored for a select group of legal professionals seeking an in-depth understanding of the intricate legal dimensions of internet technology.

Selected students will spend one semester in Milan at Bocconi and one semester in London, choosing their four elective courses out of the options tailored by King's College. They will be required to complete a thesis and may choose also to pursue a clinical work or an internship. After completing the requirements, the joint program allows students to receive both an Italian 2nd-level Specialized Master in Law of Technology and Automated Systems issued in Italy, and a Master in Law, Innovation and Technology issued in the UK.
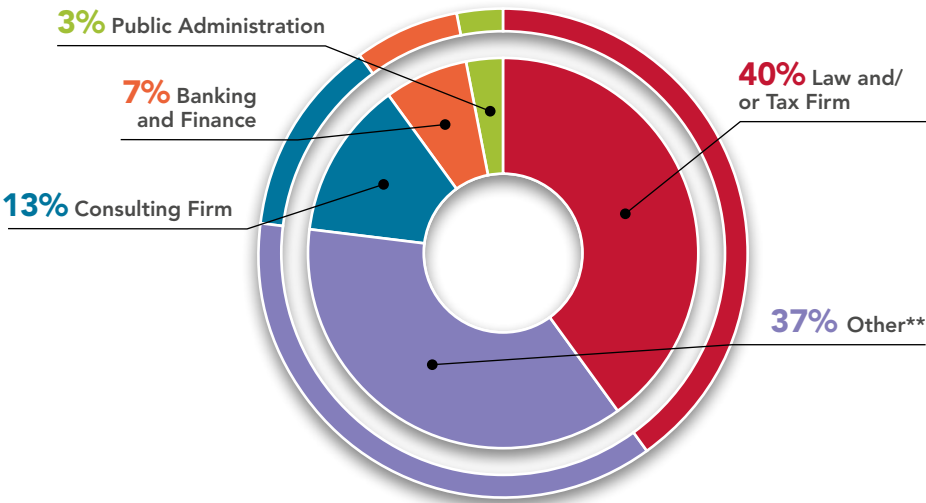

The Dual Program has specific application requirements and program fees. Please see the **website** for further details.

KARLA HOOTZ
DUAL PROGRAM – BOCCONI / KING'S COLLEGE

As a graduate of the dual program between Bocconi University and King's College London, I had the opportunity to become a member of a truly unique community. Classes given by leading international experts at the intersection of law and technology gave me and my colleagues the knowledge and common language to discuss the latest developments. I learned a lot not only from the professors, but also from the people whom I am now able to call my friends. Studying in Milan and London made the year an extraordinary, culturally rich journey that pushed me both academically and personally. I could not imagine having missed out on this, as I leave this program with broader perspectives and a reliable network. I recommend it to anyone who wants to learn, grow and live in two vibrant, forward-looking cities.

MARTA BELLI
GOOGLE (ITALY)

This LLM has proven to be an indispensable resource in addressing the intricate legal challenges posed by technology's rapid progress. With its globally diverse faculty offering a well-rounded perspective and its curriculum equipping students with the relevant skills, the program has positioned me to tackle the latest legal questions in the digital sphere. The favorable learning environment at Bocconi and the dynamic tech hub of Milan, filled with major tech companies and international law firms, make this program an ideal choice for those seeking expertise in the field. Participating in this program has tremendously impacted my professional growth and has been a key factor in my career advancement.

RUBEN CANO PEREZ
BAKER MCKENZIE, MADRID (SPAIN)

Being involved in a leading worldwide LLM has been an outstanding opportunity to interact with the best international experts on the most innovative legal matters relating to Internet technology. Understanding the manner in which law adapts to a society that moves exponentially due to extraordinary technological changes has been a real challenge. A strong Bocconi School of Law along with renowned professionals from, for instance, Harvard University, University of Haifa, Singapore Management University or the European Commission, made this adventure an enriching experience for me, boosting my career and providing me with the necessary practical skills to face the digital revolution.

VINCENZO TERRACCIANO
EY (ITALY)

This LLM was a great opportunity to explore in depth the topics of digital law and technological evolution, increasingly at the heart of the legal field. The corpus of professors is composed of top professionals in the sector from all over the world. The international environment not only allowed me to improve in law subjects, but also in technical and legal English. Thanks to the skills I acquired during the coursework, as well as through the Bocconi network, I had the opportunity to work abroad for large corporations. My time during the LLM is an experience I will always remember and thanks to which I was able to grow, both professionally and personally.

Application and Requirements

First Round

Online applications for all tracks (Full-Time, Part-Time, and Dual Program) will open in **November 2025** and close in **February 2026**. The results of the selection process will be communicated in **March 2026**.
