

Experimental Methods

Period. 2026/27–1 sem.

Instructor:

Prof. **Joachim Vosgerau**

Class times: Thursdays 08:30-11:50

Dept. of Mktg. - Room 4-C1-02

Room: 4a

joachim.vosgerau@unibocconi.it

Course description

This course focuses on the fundamental principles of behavioral experimental research, including statistical tests, causal inference, empirical adequacy, and replicability. Experimental data are often analyzed with ANOVA, a special case of regression analysis. We will cover ANOVA in detail, its differences to regression, and non-parametric tests. We will read/discuss methodological papers related to causal inference, replicability, p-hacking, sample size requirements, effect sizes and power issues, and estimation of non-linear effects.

Course Material

Textbook

Navarro, D., & Foxcroft, D. (2022). Learning Statistics with JAMOVİ (free download:

<https://www.learnstatswithjamovi.com>)

Required Skills/Knowledge/Software

- Statistical analysis: Regression
- Software: SPSS, SAS, JMP, STATA, R, Jamovi, Python, ChatGPT
- Download freeware GPower from <http://www.psychologie.hhu.de/arbeitsgruppen/allgemeine-psychologie-und-arbeitspsychologie/gpower.html>

Online Resources used in the Course

- Uri Simonsohn, Joe Simmons, and Leif Nelson: Data Colada (<http://datacolada.org/>)
- Uri Simonsohn, Joe Simmons, and Leif Nelson: p-curve (<http://www.p-curve.com/>)
- Uri Simonsohn: Two-lines test for testing u-shapes: <http://webestimate.org/twolines/>
- Ron Dotsch: Tutorial on Degrees of Freedom (<https://medium.com/@rondotsch/degrees-of-freedom-tutorial-8d8e5c7be6ec>)
- Pre-registration of experiments, hypotheses, and analyses: AsPredicted (<https://aspredicted.org/>)
- Depository for experimental research: Researchbox (<https://researchbox.org/>)
- Andrew Gelman: Statistical Modeling, Causal Inference, and Social Science (<http://andrewgelman.com/>)

Assessment Methods

Weekly Assignments

In most sessions, you are given a dataset from an experiment that you are asked to analyze. Write-up your analyses and results in journal-style format (like in the results-section in an academic journal, together with figures/tables).

Together with your write-up also submit your code to analyze the data. Assignments will be discussed in subsequent sessions.

Final Assignment

Analyze the data of a study of a published paper (tbd). Can you reproduce the results reported in the paper? If you had analyzed that data, would you have reported the same analyses/results? What would you conclude from your analysis? Prepare a couple of PowerPoint slides to present your analyses and results in class.

Class participation: 20 points

Weekly assignments: 40 points

Final assignment: 40 points

Tentative schedule

Class	Date Time	Topic	Homework/Readings
1	Oct 29 th 8:30 – 12:00	The logic of experimentation, hypothesis testing, ANOVA, simple and contrast effects	we will do assignment 1 in class
2	Nov 5 th 8:30 – 12:00	Factorial designs, interactions, ANOVA and regression, ANCOVA	Assignments 2 & 3 due
3	Nov 12 th 8:30 – 12:00	Within-subject manipulations and mixed designs	Read Assignment 4 (we will do it in class) Assignment 5 due
4	Nov 19 th 8:30 – 12:00	Effect size, power, and non-parametric tests	Assignment 6 due <u>Read the following papers:</u> Montealegre and Simonsohn (2025)
5	Nov 26 th 8:30 – 12:00	Thinking about Data Analysis, p-hacking	Assignment 7 due <u>Read the following papers:</u> Nelson et al. (2018) Simmons, Nelson, and Simonsohn (2011) Simonsohn et al. (2014 <i>JEPG</i>) André (2022)
6	Dec 3 rd 8:30 – 12:00	Preregistration, replications, meta-analysis	Final Assignment due <u>Read the following papers:</u> Banik & Simonsohn (2026) Simonsohn (2015) Simmons et al. (2021) Vosgerau et al. (2019)

Faculty Bio

Joachim earned his Diplom in Psychology from University of Konstanz, Germany, and his Ph.D. in Marketing from INSEAD, France. From 2005 to 2013 he served on the marketing faculty at the Tepper School of Business at Carnegie Mellon University, where he was also co-director of the Center for Behavioral and Decision Research (CBDR). From 2013 to 2015, Joachim was on the faculty of the Marketing Department at Tilburg University's School of Economics and Management, Netherlands. Since 2015, he is on the marketing faculty of Bocconi University in Milan, and served from 2015-24 as director of Bocconi's Experimental Laboratory for the Social Sciences ([BELSS](#)). Joachim's research interests are in the realm of consumer behavior, with a specific interest in decision making and preferences under uncertainty, and research methodology. He is an Area Editor at Management Science (Behavioral Economics and Decision Analysis), and serves on the editorial boards of the Journal of Consumer Psychology and Marketing Letters.
