Article. 1

The Università Commerciale "Luigi Bocconi" of Milan is launching a competition based on qualifications and tests for the conferral, by means of an appropriate contract, of 1 collaboration contract with the following characteristics:

Duration: 20 months (02.05.2019-31.12.2020)

Research Centre: CERGAS

Financed by: European Commission, H2020

Scientific Coordinator: prof. Rosanna Tarricone

Research Project: IMPACT HTA - Improved methods and Actionable Tools for enhancing Health Technology Assessment.

CERGAS is co-leading Work Package 10 "Guidance to support consistent HTA appraisal for orphan medicinal products" with Edinburgh University. The overarching objective of this WP is to develop guidance on novel approaches to appraising Orphan Medicinal Products (OMPs) beyond conventional economic evaluation (e.g. cost-utility models). It will seek to identify the opportunities provided by different forms of economic evaluation and consider how different forms of evidence obtained from a range of sources can be integrated with the economic model to inform robust, accountable decisions. CERGAS will also provide support to Work Package 3 "Developing a costing methodology and a core dataset of costs for facilitating cross-border comparisons in economic evaluation", lead by Escuela Andaluza de Salud Publica in Granada, Spain.

Job description:

He/she will mainly contribute to the WP's work stream 3 aiming to document the use of PROMs in appraisal of rare and ultra-rare diseases and explore better use as evidence of clinical effectiveness and in the economic evaluation. This will involve qualitative and quantitative research approaches, e.g. conducting literature reviews, interviews/surveys, case studies or utility mapping. He/she will be expected to contribute to the different project deliverables (e.g. reporting, guidance on PROMs, framework on HTA Appraisal of OMPs) and dissemination activities (e.g. high quality peer review publications, conferences) as part of work stream 5. The role will also involve project management tasks. He/she will also contribute to WP3 in collecting costing data in Italy to feed into the core dataset.
