

Business Process Modeling with ARIS

Lecturer: Dario Ambroggi

Language

English

Course description and objectives

Today the success of a company depends on the good knowledge, operation and management of its business processes (marketing and sales, procurement, production, logistic etc.). Companies need to know their processes in detail and keep them under control in order to make them efficient, effective and streamlined with the company's goals. For this reason and for the constantly changing market they adopt a holistic approach in managing business processes defined as 'Business Process Modeling'.

ARIS is the leading software in Business Process Modeling. Through ARIS, companies gain a deep understanding of their business processes and their whole enterprise structure (Enterprise Business Architecture). In this way companies are able to provide a precise picture of their functioning and can analyze the process performances (process reporting and analysis) in order to continuously improve their business. ARIS is widely used by the most important companies all around the world having more than 10.000 customers. Moreover, the leading consulting companies use the process modeling approach in order to drive different type of projects (Business transformation / Merge and Acquisition / Governance Risk & Compliance / IT Implementation) and require their consultants to have Business Process Analysis skills.

Upon successful completion of this course, students should be able to:

- design a business process architecture (a 360-degree view of company processes)
- design a detailed business process map
- perform basic analysis of a business process performance (time, resources etc.)

Audience

The course is open to all Bocconi students. In particular it is targeted at:

- EMIT and Management students and graduates
- students who want to pursue a master's degree thesis in business processes modeling or business process management
- students who want to complement their organization studies with the knowledge of a software tool that puts into practice organization theory

Prerequisites

Knowledge of management fundamentals.

Note: it is essential to subscribe to www.ariscommunity.com with your student email address (domain "@unibocconi.com"). This will give to the student the possibility to download ARIS software, receive free student licenses, access to e-learning advanced material, access to videos & articles. Moreover, any community member can get support by posting inquiries related to the ARIS software on the different forums available on the ariscommunity

Duration

16 hours

Teaching mode

It will be possible to join the course in presence and/or in distance, by connecting remotely and following the streaming of the lesson held in the classroom.

Calendar

Lecture	Date	Time	Room	Lesson in person with groups by student ID number
1	Sat 19/09/2020	09.30 - 11.00	Info AS04	Even
2	Sat 19/09/2020	11.20 - 12.50	Info AS04	Even
3	Sat 26/09/2020	09.30 - 11.00	Info AS04	Odd
4	Sat 26/09/2020	11.20 - 12.50	Info AS04	Odd
5	Sat 03/10/2020	09.30 - 11.00	Info AS04	Even
6	Sat 03/10/2020	11.20 - 12.50	Info AS04	Even
7	Sat 10/10/2020	09.30 - 11.00	Info AS04	Odd
8	Sat 10/10/2020	11.20 - 12.50	Info AS04	Odd

Syllabus of the course

Lecture	Topics	Book reference
1	Introduction to ARIS <ul style="list-style-type: none"> - BPM methodology and ARIS - Models, objects, occurrences and relationship 	Ch. 1, 3, 5, 6, 8, 11, 15
2	Before modelling a process...create the object libraries <ul style="list-style-type: none"> - The ARIS metamodel and the object libraries (organizational chart and application portfolio) - Object Properties <p><i>Exercises</i></p>	Ch. 4, 5, 8, 9, 11, 14
3	Model a process (part 1) <ul style="list-style-type: none"> - Fundamentals of process modelling - EPC (Event-Driven-Process-Chain) methodology - Process flow rules 	Ch. 7
4	Model a process (part 2) <ul style="list-style-type: none"> - Detailed process design - Process hierarchy and Model's assignment <p><i>Exercises</i></p>	Ch. 7, 12, 13

Lecture	Topics	Book reference
5	Model a process (part 3) <ul style="list-style-type: none"> - Connecting processes together: process interfaces - Top-Down approach - End to End process navigation 	Ch. 12 and 13
6	Basic Process Analysis <ul style="list-style-type: none"> - zAdmin/Configuration - Analysis - Find and report - Database Queries <p><i>Exercises</i></p>	Ch. 10 and 16
7	Case study <ul style="list-style-type: none"> - Develop the business process map of a real company <p><i>Exercises</i></p>	Ch. All
8	Course contents recap and final test	

Software used

ARIS Design Platform available for academic purposes through the subscription to the ARIS community (www.ariscommunity.com) by using the Bocconi email account. The temporary license, received after subscribing to ARIS community, allows every student to install ARIS also on his/her personal computer.

Suggested bibliography

Davis R., Brabander E. (2007), *ARIS Design Platform – Getting Started with BPM* Springer Slides, exercises, forums, blogs and articles are available to registered students on the website www.ariscommunity.com.

Available seats

This activity is limited to **60** participants. Registrations cannot be carried out once this number has been reached or after closing of the registration period.
